PROFILE SUMMARY

Motivated undergraduate student specializing in Computer Science with Data Analytics, with a strong interest in data-driven problem solving. Proven ability to work in team environments, demonstrate leadership, and communicate effectively. Experienced in data analysis tools and currently working on real-world projects, seeking opportunities to apply analytical skills and contribute to impactful solutions.

EDUCATION

B.Sc. Computer Science with Data Analytics

Sri Ramakrishna College of Arts & Science for Women , 2024 – 2027

- Current Percentage: 86%

Noyes Matriculation Hr. Sec. School - Madurai

- Class XII: 76% (2024))

INTERNSHIP

Machine Learning Intern

Adroit Technologies

- Worked on machine learning project titled “AI- Based Smart waste management and Route Optimizition” involving data preprocessing, feature engineering, model training, and model evaluation.
- Utilized Python, Pandas, Scikit-learn, and Flask to develop predictive models and analyze data for actionable insights.

Data Analyst Intern

AuroiTech

- Worked on data analysis for the Pre-registration app and worked on data analysis tasks including data cleaning, visualization, and reporting.
- Utilized tools like Excel and Power BI to generate insights.

SKILLS

Technical Skills

Programming: Python,SQL

Data Science: Machine Learning, Data Analysis, Data Visualization, Artificial intelligence

Databases: Oracle , Mongodb,DBMS

Concepts: Cloud computing(AWS), Computer Networks

Tools: Power BI, Microsoft Excel, GitHub, VS Code, Jupyter Notebook, Google Colab,Tableau.

PROJECTS

AI-Based Smart Waste Management and Route Optimization (AI & Machine Learning | Flask)
Developed an AI-based waste management system to optimize waste collection routes using machine learning algorithms.
Built a Flask web application for route prediction and efficient waste collection management.
Technologies: Python, Flask, Machine Learning, Pandas, NumPy, Scikit-learn, HTML, CSS, JavaScript.

AI-Based Resume Screening Application (AI & Machine Learning | Flask)
Developed an AI-powered resume screening application that automates candidate evaluation by matching resumes with job descriptions.Built a Flask-based web application integrating NLP and machine learning for resume analysis and candidate ranking.Technologies: Python, Flask, NLP, Machine Learning, Scikit-learn, Pandas, HTML, CSS, JavaScript.

Profit and Cannibalization Dashboard (IBM Hackathon) (Data Analytics | Power BI)
Developed an interactive dashboard to analyze profitability and identify product cannibalization trends.
Created dynamic reports with KPIs, filters, and visualizations to support business decision-making.
Technologies: Power BI, DAX, Power Query.

Data Analysis for Dhrishti Pre-Registration App (Data Analysis | Microsoft Excel)
Analyzed pre-registration data to identify user trends and generate actionable insights.
Created interactive dashboards and reports using Pivot Tables, charts, and advanced Excel functions.
Technologies: Microsoft Excel, Pivot Tables, Pivot Charts, Power Query.

Insurance Premium Prediction System (Machine Learning | Python, Flask)
Developed a machine learning-based application to estimate health insurance costs based on individual factors such as age, BMI, smoking habits, and other personal details. Implemented and evaluated Linear Regression and Random Forest Regression models to predict insurance charges. Created a user-friendly web application with prediction history, SQLite database integration, and an analytics dashboard.
Technologies: Python, Flask, Machine Learning, Scikit-learn, Pandas, SQLite, HTML, CSS, JavaScript.

CERTIFICATION

- IBM Data Visualization , Buisness Intelligence using Cognos
- GUVI Python Zero to Hero
- GUVI Generative AI
- NPTEL Database Management.
- CRUZZE AI and ML

ACHIEVEMENTS

- Winner – Inter-College Hackathon
- Represented the college at the IBM ThinkFest National Hackathon, Surat
- Winner –Technical Paper Presentation Competition
- NSS Volunteer
- English Department- Joint Secretary
- Winner- HackAce 2026 at KPRIET International Hackathon
